## Employment

### April 2024 – Present

#### UI/UX Designer II at MIM Software

- Created Figma prototypes for MIM Maestro, MIMcloud, and product integrations with partners GE Healthcare and Elekta.
- Collaborated with product managers to conduct user tests and reevaluate design proposals based on user feedback.
- Advocated for product design considerations while on the Radiation Oncology product strategy team.
- Assisted the technical communication team with creating better training materials using a SCORM eLearning software.
- Designed Figjam templates to assist with discussions during cross collaborative meetings.
- Continued design system maintenance for MIM products.

### May 2023 – April 2024

#### UI/UX Designer at MIM Software

- Developed and maintained design systems with Figma Libraries for web apps and cloud software.
- Standardized processes for creating, maintaining, and archiving design files within the UI/UX team.
- Redesigned 1000+ medical icons to be more consistent.

### May 2022 – May 2023

#### User Interface Design Intern at MIM Software

- Developed a design system for our internal CRM platform while working alongside other UI/UX designers.
- Worked alongside the marketing design team to create a clinical science poster Figma template for trade shows.

### June 2021 – September 2022

#### Graphic Designer at Hive Design Group

- Crafted logos for campus organizations and local businesses.
- Designed brochures, websites, and marketing materials.
